Required Area:

- ✓ 30 m² (Clean Room)

Production Per Time Unit:

2.000 - 4.000 Spray per Hour (It Depends on the Size).

Production Cost Per Unit:

1 - 2 US\$ per Spray (It Depends on the Size).

Abstract:

Even superficial wounds can become infected if they're not cleansed effectively. Cleansing the wound is an essential first step for optimal healing and it is recommended for all types of wounds. My Antiseptic Cleansing Liquid is an easy-to-use spray for the antiseptic cleansing of minor acute wounds such as cuts, abrasions, first and minor second-degree burns and open blisters, by mechanical irrigation. It can also be used for chronic wounds and postoperative wound care as per your doctor's instructions. My Antimicrobial Wound Spray also helps to remove crusts or clotted dressings.

It is free of alcohol and does not cause stinging during application or dry the skin. My Antimicrobial Wound Spray is a pain-free and effective way to cleanse wounds from dirt and bacteria and prevent from wound infections. The solution is transparent, so it won't stain clothing like tinted products containing for example Iodine or Eosin.

Market Size:

The global wound cleanser products market was valued at USD 1.61 billion in 2021 and is expected to grow at a CAGR of 3.4% during the forecast period (2022 - 2030).
